AIRPORT OPERATIONS BLDG, 12 NOON**

VISITORS: NONE

Absent: Brent Reese

MINUTES: JULY 12, 2013 APPROVED

CORRESPONDENCE:

**T-O ENGINEERING,
GRANT COUNTY FAIRGROUNDS**

AIRPORT INSPECTION: JERRY RICHARDSON

SEPTEMBER INSPECTION: LEW MASON

OLD BUSINESS

A: TAXIWAY CRACK SEAL & REPAIR

Some discussion on what we need to be working on. The consensus was that since we are asking, and expecting a grant to fix the runway, and the taxiways will not be included in the grant request, that we should continue working on filling the cracks in the taxiways with sand and using the tar we have to cover the cracks. We can be working to fill with sand now, and get a work group together to do the tar.

B: GRANT STATUS

In progress, Jerry provided some information. We do have some money for a study, and the plan is to do an overlay of the runway, at its current width. There won't be a request to repair the taxiways and run-up areas. He wasn't sure what the total request amount will be.

C: MARTY SHAW FUEL SYSTEM

There was some discussion on the viability of purchasing his tanks and system, now located at the Ephrata airport. Most of the comments were that we are not in favor of buying the tanks or system.

D: WEED CONTROL REPORT

There are weeds at the airport and we are working on getting rid of them. Tom, Jerry, Darel, and Lew have all sprayed for weeds in the past month. Tom has purchased more chemicals and is using his jeep spray rig. Monte Dent has been helping too. We need more on going volunteer effort to keep control the weeds. We have a small 44 inch brush mower but need something to pull it.

NEW BUSINESS

A: WSDOT AVIATION PLANNER – JOHN MACARTHUR

August 6, Meeting RE: SCIP
