

MOSES LAKE'S MOST WANTED:

CLEAN WATER ENEMY NO. 5:

THE LITTERER

Wanted for:

Aesthetic crimes, storm system plugging
and habitat destruction

Keeping trash out of our waterways should be a no-brainer. Not only does it junk up the shoreline, but it's harmful to everything that lives in the watershed.

And though it might seem like an easy solution to blow all those fallen leaves and yard waste out into the gutter, rainwater can sweep it downstream and into the lake. Yard waste and trash can plug up a storm drain entirely, causing system failure and flooding.

We all learned it in kindergarten: Pick it up and put trash where it belongs – in the can.

**IF YOU DROP IT, IF YOU
SEE IT, IF YOU JUNK IT,
PICK IT UP!**
