16	Contract Price (given by contractor) Sawcut 6' curb	LS		

The Contractor or property owner shall obtain a Street and Utility Construction Permit. The permit fee is 2 ½ percent of the cost of construction for the work that the City inspects, but not less than \$50. The Contractor shall provide an estimate of the work, based on the rates established in Table 1. If specific rates are not established by Table 1 for a particular project, the Contractor may provide a project quote for review by the Engineer. The Engineer will base approval of the cost of the project on a reasonable estimate of what the project would cost the City of Moses Lake.

^a Refer to section titled Table 1: Established Rates for Permit Calculations of the Moses Lake Community Street and Utility Standards 2018 for more information.
